DEVLOPMENT   PROJECTS

Top Courses ⤢
- In this project, I developed a top-course website using **HTML** , **Tailwind - CSS** , **JavaScript ,React.js** and **react-Toast** . I
- integrated an API to retrieve product data for a store that user can add to cart.
- There are many courses which you can like and dislike with a toast appears with it. There are 5 filter button to filter the courses.

Shopping Cart ⤢
- In this project, I developed a shopping website using **HTML** , **Tailwind - CSS** , **JavaScript ,React.js, Redux Toolkit** and **react-Toast.**
- I integrated an API to retrieve product data for a store that user can add to cart. The
- product you can add to cart page with a toast appear on adding and removing.On
- Cart page, you can delete the cart added product and also buy it.
- This project demonstrates my skills in front-end web development, API integration , and data visualization.

Blog App ⤢
- In this project, I developed a Backend website using **HTML** , **JavaScript , Node.js , Express.js and MongoDB Atlas** .
- You can create a post with a title and body as description. You can **like or dislike** the post and **comment** on the particular post.
- Integrated MongoDB as the backend database to provide scalable and persistent storage, enhancing the project's reliability and performance.

Weather App ⤢
- In this project, I developed a weather website using **HTML**, **CSS**, and **JavaScript**.
- I integrated an API to retrieve weather data for a city that a user searches . It fisrt ask permission access your location to get your weather location.
- This project demonstrates my skills in front-end web development, API integration , and data visualization.
